

The Experts in Cloud Transformation

With the myriad of benefits that come with Cloud Transformations, having “clouds on your horizon” is a positive omen for businesses!

At Poeta Digital, we provide cloud native application development, cloud migrations, cloud architecture and security reviews as well as design and implement foundational architectures to deliver secure, high performing and cost optimized AWS solutions to customers.

Cloud Application Development Services

Whether your applications are Native Mobile, Cross-Platform, Hybrid Mobile or Progressive Web Applications - we have extensive experience with them all.

Our Cloud Applications are built on a secure, high-performing, resilient and cost optimized AWS Foundational Architecture.

We can help bring additional business value to your existing applications by adding key features/functionality and taking advantage of innovative Cloud technologies like IoT, data analytics, AI/ML or overcome challenges associated with hybrid cloud environments and integrate your on-premise apps and tools and public cloud so they all work together.

With over **15 years** of experience in application development.

We have developed over **300 web and mobile applications** for customers across 5 continents.

Our Cloud Applications are built on a secure, high-performing, resilient and cost optimized **AWS Foundational Architecture**.

AWS Foundational Architecture Services

* Architecture Design & implementation Services

We follow the AWS Well Architected Framework to design and implement cost effective, performance optimized, redundant, secure and compliant AWS Foundational Architecture. We can help you to implement an environment to bring your business and all of its workflows to a safer, more reliable platform.

* Architecture and Security Reviews

We'll review existing system architecture or complete a security audit of your AWS environment, then recommend ways for you to enable better performance, scalability, manage your security posture and rightsize your instances to optimize costs.

Our team of certified AWS Engineers can help to implement recommended features into your environment quickly and efficiently with minimal disruption to workflow.

Cloud Migration Services

Our team can replatform or re-architect existing applications, or simply lift and shift applications to the cloud. In fact, we can help you migrate any workload - applications, websites, databases, storage, physical or virtual servers - and even entire data centers from an on-premise environment, hosting facility, or other public cloud to AWS to start gaining business benefits.

So if you are looking to bring your applications and infrastructure into the modern day and protect your data, we offer dedicated migration experts and a trusted methodology to make the entire experience simple and secure.

Global statistics from IDC

413% five year ROI
10 months to pay back
50% lower five-year cost of operations
25% lower cost of infrastructure
47% more efficient IT infrastructure team
